4th Quarter Vision of the Graduate Progress

To support our students for success beyond high school, Litchfield High School's Vision of the Graduate defines the transferable skills, understandings, and dispositions which, in addition to content area knowledge, prepare our students to engage confidently in a variety of areas beyond high school. The Vision of the Graduate is broken down into four domains: critical thinking and reasoning; communication, collaboration, and civic engagement; problem-solving and innovation; and self-direction and resourcefulness.

"Exemplary" (E) - learner demonstrates all indicators of the domain consistently  
 "Proficient" (P) - learner demonstrates a majority of the indicators of the domain consistently  
 "Developing" (D) - learner demonstrates few of the indicators and/or demonstrates the indicators inconsistently
